

IN THE CLAIMS:

The current claims follow. For claims not marked as amended in this response, any difference in the claims below and the previous state of the claims is unintentional and in the nature of a typographical error.

1. (Currently Amended) A switched input video device comprising:

a switched input

at least one of video improvement circuitry and transcoder circuitry; and

a switch for communicating [[a]] the switched input to at least one of the video improvement circuitry and the transcoder circuitry, wherein the switch is operable to sense a presence of a signal on the switched input and communicate the switched input to the at least one of the video improvement circuitry and the transcoder circuitry in response to the sensed signal.

2. (Currently Amended) The switched input video device as recited in claim 1,

further comprising an internal medial media player and wherein the switch selects either the Internal medial player or the switched Input

3. (Currently Amended) The switched input video device as recited in claim 1,

wherein the switch [[in]] is externally controlled.

DOCKET No. TAYL08-00002
SERIAL NO. 10/665,930
PATENT

4. (Currently Amended) The switched input video device as recited in claim 1,
wherein the switch [[in]] is remotely controlled.

5. (Canceled)
